Current \$1.2MM Drill Program Designed To Increase Mineral Resource Value

May 10, 2011 - Spokane, Washington: Robert L. Russell, President and CEO of Josephine Mining Corp. ("Josephine" or the "Company") (TSXV – JMC) announces that it is the Company’s desire to fast track the development of their Turner-Albright Gold Project and has initiated an in-fill drill program budgeted to spend \$1.2 MM to drill 12,000 ft. Drilling is scheduled to begin during the Q2 2011. The goal of this 12 twelve drill hole program is to improve the classification of a portion of the mineral resource, as well as increase the total resource tonnage. This program will substantiate the existing results data from earlier drilling.

The mineral resource is a Cyprus-type ophiolite-hosted volcanogenic massive sulfide (VMS) gold, copper & zinc deposit. The Turner-Albright Project’s NI 43-101 Preliminary Economic Assessment (PEA) tonnes and grades from previous drilling are:

**Turner Gold Deposit
 Mineral Resources**

Mineral Resource at Metal Prices, \$900/oz Gold, \$2.00/lb Copper, \$12.50/oz Silver, \$0.65/lb Zinc												
Category	Cutoff NSR/t	Short Ktons	NSR \$/ton	Gold oz/ton	Copper %	Silver oz/ton	Zinc %	Cobalt %	Contained KOzs Gold	Contained KLbs Cu	Contained KOzs Silver	Contained KLbs Zn
Undiluted Indicated	\$42.00	2,447	92.88	0.090	1.25	0.31	2.65	0.047				
Mining Recovery 90%		2,202	92.88	0.090	1.25	0.31	2.65	0.047				
Mining Dilution 10%		220	42.26	0.049	0.50	0.16	0.79	0.038				
Indicated (Recovered + Diluted)		2,422	88.27	0.086	1.18	0.30	2.48	0.046	209	57,245	718	120,169
Undiluted Inferred	\$42.00	2,084	86.40	0.088	0.99	0.64	2.78	0.036				
Mining Recovery 90%		1,876	86.40	0.088	0.99	0.64	2.78	0.036				
Mining Dilution 10%		188	42.26	0.049	0.50	0.16	0.79	0.038				
Inferred (Recovered + Diluted)		2,064	82.38	0.084	0.94	0.59	2.60	0.036	174	38,991	1,223	107,290
Indicated + Inferred		4,486	85.56	0.085	1.07	0.43	2.54	0.041	383	96,236	1,941	227,459

Notes:

Undiluted calculations are from the block model at the \$42.00/ton NSR cutoff
 Undiluted calculations require each block to have 4 neighbors above cutoff grade
 Dilution grade based on the grade of material surrounding the undiluted tabulation, at a \$5.00/ton NSR cutoff

The statement of mineral resources above is from the technical report dated 16 November 2009 and as revised on May 17, 2010. John Marek of Independent Mining Consultants, Inc. acted as the “Qualified Person” for the mineral resources within that technical report, and has reviewed this press release.

Significant intercepts from previous drilling are given below. Josephine is in possession of the entire drill core and will conduct further verification assays of these significant intercepts. The historical drill log summary as previously published is:

Hole No.	Intercept From (FT)	Intercept To (FT)	Core Intercept (FT)	Gold oz/ton	Silver %	Copper %	Zinc %	Cobalt %

Current work is directed toward preparation of a preliminary feasibility study to be completed in 2012. The planned program's metallurgical and geologic data is scheduled to be completed this year. The Company's technical staff is directing permitting, engineering, and design activities for the project, and is also coordinating on-site efforts in support of the current drilling program.

Further, in keeping with managements' historical and continued commitment to maximize shareholder return on investment, Josephine is aggressively executing its ongoing program of evaluating potential acquisition candidates. Interested investors should look forward to ongoing material updates on the Turner-Albright Gold Project.

Disclaimer for Forward-Looking Information

This press release contains projections and forward-looking information that involve various risks and uncertainties regarding future events, such as the statements that: (i) Diamond drilling and geologic data are planned for Q2 and Q3, 2011. (ii) A preliminary feasibility study will be completed in 2012. Forward-looking statements consist of statements that are not purely historical, including any statements regarding beliefs, plans, expectations or intentions regarding the future. Such statements are subject to risks and uncertainties that may cause actual results, performance or developments to differ materially from those contained in the statements. No assurance can be given that any of the events anticipated by the forward-looking statements will occur or, if they do occur, what benefits the Company will obtain from them.

These forward-looking statements reflect management's current views and are based on certain expectations, estimates and assumptions which may prove to be incorrect. A number of risks and uncertainties could cause our actual results to differ materially from those expressed or implied by the forward-looking statements such as the current economic conditions and the state of mineral exploration and mineral prices in general. These risks and uncertainties could cause actual results and the Company's plans and objectives to differ materially from those expressed in the forward-looking information. The Company can offer no guarantee that its goals and objectives detailed above will be accomplished, in part or at all.

These forward-looking statements are made as of the date of this news release and, except as required by law, the Company assumes no obligation to update these forward-looking statements, or to update the

reasons why actual results differed from those projected in the forward-looking statements. Additional information about these and other assumptions, risks and uncertainties are set out in the “Risks Factors” section in the Filing Statement of the Company dated October 10, 2010 and available on www.sedar.com.

Neither TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.
